## SKILLS

- JavaScript
- Nest Js
- Express JS
- SQL
- MySQL
- Docker
- Postman
- Effective communication
- Problem-solving
- Typescript
- NodeJS
- Git and GitHub
- Mongo DB
- Jest
- Kubernetes
- Scrum methodology
- Collaboration
- API design and development

## EDUCATION

08/2018 - 08/2023

Bells University of  
Technology | Nigeria

Bachelor of Engineering:  
Computer Engineering

## LANGUAGES

English

Proficient (C2)

## PROFESSIONAL SUMMARY

A Software Developer with over 3 years of expertise in designing, developing, and deploying scalable software solutions. Expert in multiple programming languages and frameworks, delivering high-quality applications that meet user and business needs. Experienced in troubleshooting, optimizing system performance, and collaborating with different teams to ensure seamless project execution. Intent in leveraging innovative technologies to enhance user experiences and drive organizational success.

## WORK HISTORY

09/2025 - current

Full stack developer

Jivy Logistics | Alimosho

- Developed backend services for **Jivy Logistics**, a campus-focused delivery platform, using **NestJS** and **MongoDB** to support scalable order and logistics management.
- Built APIs for **real-time delivery tracking**, parcel management, and vendor integrations tailored for campus logistics.
- Integrated **payment processing** (with webhook support and transaction verification) to handle orders and ensure seamless checkout experiences.
- Enhanced **backend performance**, implemented **error monitoring and logging**, and maintained **production-ready deployment pipelines**.
- Collaborated with the frontend team to ensure smooth **API design, data flow, and user experience** for fast campus deliveries.

07/2025 - 09/2025

Full stack developer

Fastbites | Alimosho

- Designed and developed backend infrastructure for FastBites, a food delivery platform, using **NestJS** and **MongoDB** to ensure scalable and efficient order management.
- Implemented **user authentication, authorization, and account management** with secure RESTful APIs to support customer, restaurant, and delivery partner interactions.
- Integrated **payment processing** (with webhook support and transaction verification) to handle orders and ensure seamless checkout experiences.
- Built APIs to support **real-time order tracking**, restaurant menu management, and delivery partner assignments, optimizing data flow between frontend and backend.
- Implemented **user** a flow between the AI model and the frontend.
- Ensured **secure data handling**, optimized API performance, and added **error tracking and logging** for production reliability.

03/2025 - 07/2025

**Full stack developer**

**Atre Usa**

- Designed and developed backend infrastructure to support ATRE AI's intelligent document retrieval platform, delivering accurate, AI-generated, and cited insurance and compliance documentation.
- Implemented **user authentication, authorization, and account management** systems using secure RESTful APIs.
- Integrated **Paystack** for seamless payment processing, supporting both subscriptions and one-time transactions with webhook support and transaction verification.
- Collaborated with the AI engineer to handle prompt-response workflows, ensuring efficient API design and data flow between the AI model and the frontend.
- Ensured secure data handling, optimized API performance, and implemented error tracking and logging for production stability.
- Built scalable backend services that support real-time document fetching and session-based interactions.
- Wrote documentation and assisted in deploying services to staging and production environments.

01/2025 - 03/2025

**Backend developer**

**Apt Securities and Funds Limited**

- Developed and maintained backend services supporting a React Native investment/trading app for APT Securities and Funds Limited.
- Designed and implemented secure, scalable **RESTful APIs** for user management, stock data, trade processing, and account operations.
- Integrated with internal and external financial systems to provide real-time access to user portfolios, transactions,

and market data.

- Ensured data integrity, security, and compliance with financial regulations through robust validation, logging, and error-handling strategies.
- Collaborated closely with frontend/mobile developers to align backend logic with user interface needs.
- Optimized database queries and backend response times to ensure a smooth mobile user experience.
- Participated in deployment and version control using Git, and contributed to API documentation and testing.

*08/2024 - 12/2024*

**Full Stack Developer Trainer**

**Techstartersafrica**

Provide in depth training on full stack development as part of Africa's first premium in-house tech training, ensuring a 90% student success rate. Guide students through hands-on coding exercises, improving their practical skills by 85%. Mentor aspiring developers, helping them build real-world projects with a 95% completion rate. Simplify complex programming concepts, leading to an 80% increase in student comprehension. Equip learners with job-ready skills, resulting in a 75% employment rate after course completion.

*01/2024 - 07/2024*

**Full Stack Developer Trainer**

**Melodia Coding Academy**

Guided junior developers in full stack development, improving their coding efficiency by 85%. Conducted hands-on training sessions on web technologies, increasing participants' proficiency by 90%. Reviewed and optimized mentees' code, reducing errors by 80%. Provided technical support and troubleshooting assistance, resolving 95% of reported issues. Mentored developers on best practices, leading to a 75% improvement in project completion rates.
